On the 18. September in the organization of the city of Velika Gorica and the Velika Gorica health centre and as a part of the European mobility week a lecture for the fourth and fifth grade-schoolers took place on the topic of Mobility and health with appropriate demonstrations. There were about a hundred pupils, their teachers and the city representatives present. The program started with an introduction given by the Ljubica Zrno, the head nurse of the Velika Gorica health centre and the rest you can see on the photographs.

The Goal was to warn the students on the correct way of sitting, posture, working with a computer, carrying a schoolbag and few more details that mean so much in the prevention of spine problems. These wonderful young people were full of questions which I believe were successfully answered.

A big thank you to goes out to the pupils, teachers, misses Ljubica and the members of the city council for a warm reception and a delightful time.
